

EDUCATION SECTOR.

PARKLEX PRODEMA

Currently, we spend 80% of our time indoors. For this reason, the design of the interior spaces of the buildings, as well as the fact that these provide a connection with nature, is becoming increasingly important. The use of natural wood makes a unique contribution to buildings and generates a natural and positive human response.

“A 2012 study at the University of British Columbia and FPIInnovations demonstrated that the presence of wooden visual surfaces in a room reduced the activation of the sympathetic nervous system. The SNS is responsible for physiological stress responses in humans.”*

“Wood has psychic effects on humans and reduces stress in the same way as nature in general” (Marjut Wallenius, PhD in psychology and professor at the University of Tampere).**

People feel a natural affinity for nature.

NATURAL WOOD.

Wood provides warmth and comfort to spaces. It is a noble material that brings prestige and increases the status of the project.

Wood to design projects that convey the quality of the service offered by the client.

Wood offers a great diversity of design options (range of wood species) and coordinates adequately with all types of materials (coexists harmoniously).

Wood for all types of coatings and applications -versatility-, ensuring perfect aesthetic coordination: floors, walls, ceilings, doors, furniture, wet areas and areas in contact with water, areas high traffic, soffits, etc.

SUSTAINABLE RAW MATERIALS.

With PARKLEX PRODEMA's products, raw forest materials are an important part of the product. Aware of the importance that forest masses have for development of life on the planet, and to limit the greenhouse effect, we believe in purchasing sustainable forest products*. Maintaining forests with controlled, appropriate felling helps to maintain biodiversity and the recovery capacity of the forests themselves.

In addition to environmental benefits, purchasing certified products has economic and social benefits, since it guarantees dignified social and labour conditions for the employees of the forestry management companies and other companies farther down the chain. In many cases, it is also a huge boon to revitalise rural areas.

*Having the FSC and PEFC certificates allows to select products from forests subjected to sustainable forestry practices that are respectful of the environment -in accordance with current legislation-.

DURABLE PRODUCTS.

The life cycle of an HPL is more than thirty (30) years. Our products are durable and sustainable. The surface composition of the boards protects the wood from the most extreme weather conditions, from the moisture, the wear, the scratches, the impacts, the stains and dirt... eliminating any need for subsequent treatment. It is an ideal material for high traffic spaces.

Thanks to its durability, it is not necessary to apply any type of maintenance.

[NATURFLOOR-W](#)

MAINTENANCE-FREE NATURAL WOOD FLOOR FOR INTERIORS.

NATURFLOOR-W is a maintenance-free floor for indoor spaces. This is a durable and sustainable product, stain-resistant and 100% water-resistant. There is an option to specify even better anti-slip resistance. This is an AC6 score on wear resistance and Grade-4 scratch resistance product.

Designed specifically for areas with heavy traffic, like hotels and restaurants.

Maintenance-free

[Wear resistant](#)

[Scratch resistant](#)

[Water-tight](#)

[Slip resistant](#)

High-heels resistant

Stain resistant

Easy to clean

Sustainable

If we compare NATURFLOOR-W with a traditional wooden floor, the maintenance cost of NATURFLOOR-W throughout its useful life is much lower. Thanks to its hardness and abrasion properties, the PARKLEX PRODEMA natural wood floor does not need sanding or varnishing to continue as the first day.

GUGGENHEIM BILBAO MUSEUM Frank O. Gehry | 1997

[NATURHARDPANEL-W](#)

MAINTENANCE-FREE NATURAL WOOD PANEL FOR INTERIOR WALLS AND CEILINGS.

Natural wood that is extremely moisture- and fire-resistant, for interior walls and ceilings.

Thanks to the technical leak-tightness and moisture-resistance properties of the natural wood veneer, NATURHARDPANEL-W brings a feeling of special warmth to indoor areas in frequent contact with water. It is also a high resistance covering for commercial spaces.

It has been designed for high-traffic areas such as hotels and restaurants.

NATURSKININT-W

NATURAL WOOD VENEER FOR APPLICATION ON SURFACES.

NATURSKININT-W is a high density natural wood veneer. Its thickness (1mm) makes it flexible for application on different surfaces, such as doors, columns, furniture and other interior elements. It adheres to any material -chipboard, fiber cement, MDF, metal, etc.- and its radius of curvature of up to 25cm / 9.85" allows it to cover rounded corners, columns,... Suitable for covering doors, making furniture, etc.

[NATURSOFFIT-W](#)

MAINTENANCE-FREE NATURAL WOOD PANEL FOR SOFFIT APPLICATIONS.

NATURSOFFIT-W is an HPL product with natural wood designed for exclusive use in sheltered and horizontal applications, such as false ceilings and roofs. The panels cannot be directly exposed to ultraviolet radiation or water, but they can be applied to outdoor areas protected from these two elements. They do not require maintenance and provide outdoor spaces with the warmth and versatility of a natural wood design.

NATURSOFFIT-W increases the range of wood species for outdoors without maintenance.

[NATURCLAD](#)

MAINTENANCE-FREE WOODEN AND SUPER-TEXTURIZED PANELS FOR FAÇADES.

NATURCLAD coverings provide for installation of wood covering (NATURCLAD-W) or super-texturized panels (NATURCLAD-B) for ventilated façades, with no need for maintenance.

They consist of a high-density Bakelite body, a wood veneer treated with synthetic resins on the surface (NATURCLAD-W) or a unique texture on the surface that does not create repeated patterns (NATURCLAD-B), and a triple-layer exterior film that provides greater durability to the panels and protects them from solar radiation, atmospheric agents, and dirtiness, and has anti-graffiti properties.

[NATURDECK-B](#)

MAINTENANCE-FREE SUPER-TEXTURIZED PANELS FOR EXTERIOR FLOORS.

NATURDECK-B is a high-density composite floor for outdoors. It is extremely resistant to atmospheric moisture and temperature changes and is ideal for patios, walkways, our perimeters outside buildings.

Product with wood DNA: we use natural wood when manufacturing to endow the product with its own characteristics. We play with pigmentation (and its opaqueness) to add totally new colours.

PRODUCTS MAIN FEATURES

MOISTURE RESISTANCE.

Thanks to PARKLEX PRODEMA'S proprietary technology based on wood encapsulation, NATURHARDPANEL-W is entirely moisture-resistant.

Thanks to the technical water-tight and moisture-resistance properties of the natural wood veneer, NATURHARDPANEL-W brings a feeling of special warmth to indoor areas in frequent contact with water. It is also a high-performing panel for commercial spaces like hotels and restaurants.

NATURHARDPANEL-W has been designed for high-traffic areas such as hotels and restaurants.

PRODUCTS MAIN FEATURES

WATER TIGHT.

NATURFLOOR-W is a maintenance-free hardwood floor for interior spaces that never needs to be refinished.

The anti-moisture treatment on the surface, along with the birch plywood (9-layer marine grade baltic birch plywood) and counterbalance with HPL barrier, applicable to all woods and finishes, means that NATURFLOOR-W can be installed in areas frequently in contact with water. There is an option to specify even better anti-slip resistance.

This is a durable and sustainable product (FSC), 100% water-resistant, and with an AC6 score on wear resistance and Grade-4 scratch resistance. This makes it an ideal material for commercial spaces with heavy traffic. NATURFLOOR-W does not have any ledging issues.

PRODUCTS MAIN FEATURES

SLIP RESISTANCE.

The anti-moisture treatment on the surface, along with the birch plywood (9-layer marine grade baltic birch plywood) and counterbalance with HPL barrier, applicable to all woods and finishes, means that NATURFLOOR-W can be installed in areas frequently in contact with water.

It is a perfect product for areas such as emergency exits, stairs, slopes...

PRODUCTS MAIN FEATURES

WEAR RESISTANCE.

NATURFLOOR-W is resistant to wear and abrasion AC6.

It is designed for areas with heavy traffic, where specifications for use are very strict and one wishes to maintain the wood's beauty intact.

NATURFLOOR-W is developed to avoid marks on the floor caused by sharp or pointy objects. High heels and pets do not damage the product (grade-4 scratch resistance).

The phenolic layer increases the durability and indentation resistance.

No other manufacturer has this technology.

PRODUCTS MAIN FEATURES

SCRATCH RESISTANCE.

NATURFLOOR-W, NATURHARDPANEL-W and NATURSKININT-W are grade-4 and grade-3 scratch resistant products.

These products are designed for areas with heavy traffic, where specifications for use are very strict and one wishes to maintain the wood's beauty intact.

NATURFLOOR-W is developed to avoid marks on the floor caused by sharp or pointy objects. High heels and pets do not damage the product.

The NATURHARDPANEL-W and NATURSKININT-W plank's surface composition makes the wood a scratch- and impact-resistant material. A protective layer is added to the surface, which stabilizes its light fastness.

No other manufacturer has this technology.

PRODUCTS MAIN FEATURES

FIRE PERFORMANCE.

NATURHARDPANEL-W has the best possible result for organic material in terms of fire performance: Class A | B-s1,d0.

Fire performance can be fire-resistant or standard.
