THERE IS ONLY ONE WAY FOR US
THE SUSTAINABLE WAY

“We see **sustainable thinking and acting** as our social responsibility. That's why we, as the fourth generation of the entrepreneurial family, will also continue to follow this path. More light, more air, more climate protection has a deep meaning to us - because this is how we contribute to **environmentally conscious, energy-efficient and climate-friendly construction** in your projects.”

- Alexander and Johanna Strunz, Members of the Management Board -

LAMILUX Glass Skylight F100 Circular

LAMILUX MODULAR GLASS SKYLIGHT MS78

THE BEST OF TWO WORLDS

Combines the advantages of two proven systems with new glass roof innovations

The MS78 ensures optimum daylight incidence and high ventilation comfort. The native vent integration creates a homogeneous overall appearance of the vents and fixed elements. The high degree of prefabrication ensures high quality standards and short delivery times.

LAMILUX CONTINUOUS ROOFLIGHT SYSTEMS

DAYLIGHT NON-STOP

Generous **daylight incidence**, as well as natural **ventilation** in industrial warehouses or sports halls.

LAMILUX continuous rooflights provide **safety** through ingenious **fire protection technology**, also due to the possibility of integrating SHEV systems.

Logistikzentrum, Hoppegarten

LAMILUX GLASS ARCHITECTURE

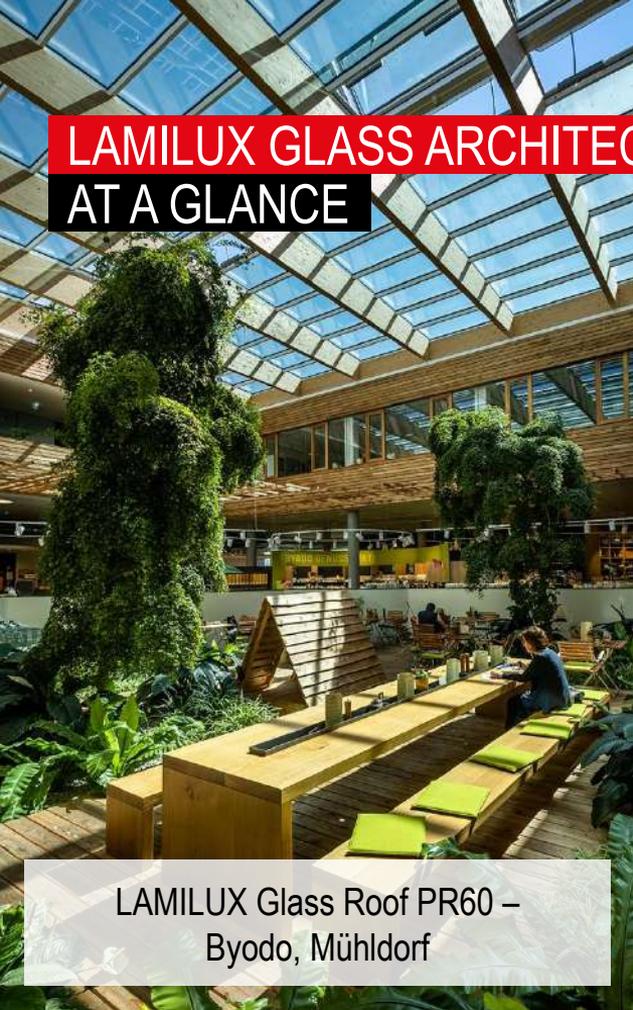

LIVING WITH LIGHT

Individual glass roof constructions made of aluminium and glass with the help of our **extraordinarily dimensionally stable** mullion-transom system.

Completely **free geometries** offer the prerequisite for **modern architecture**
– here also Passivhaus standard.

LAMILUX SMOKE AND HEAT EXHAUST SYSTEMS FOR EFFECTIVE FIRE PROTECTION CONCEPTS

In case of fire, SHEVS ensure rapid **smoke extraction** and **heat relief**, which is why they play a significant role in the planning of **fire protection concepts**.

With over **50 years of experience** in the planning and implementation of **qualified SHEV systems**, you have an experienced partner in LAMILUX.

LAMILUX RENOVATION

ALLOWING YOU TO BENEFIT FROM NATURAL LIGHT IN THE FUTURE AS WELL

Renovation requires **experience & expertise** from planning to installation. LAMILUX not only thinks in terms of new objects, but also renovates every daylight element **regardless of the manufacturer**.

Of course, we pay close attention to **legal regulations, health regulations** and **industrial requirements** in the process.

PROFESSIONAL MAINTENANCE AND SERVICING

With professional and **regular maintenance** and servicing, you ensure the **functionality** and extend the **life of your SHEV systems.**

BIM: BUILDING INFORMATION MODELING CONSTRUCTION GOES DIGITAL

With the help of the **product configurator**, processors and planners have **digital access** to LAMILUX products and can **request quotations** directly.

Individual configurations are available for **all planning levels** in detail levels from LB100 to LB500 and can be transferred to **architectural programs** such as Revit, ArchiCAD or Allplan.
