

ECHO
Nature's essence,
architectured.

ECHO

NATURALS COLLECTION

Echoes Beyond Nature – Innovative surface solutions that elevate the façades of raw, natural materials.

Each new decor in the Naturals Collection echoes the earth's enduring materials – from rich minerals to volcanic stones – refined for modern architectural expression.

Urban Modernity

**A rough and refined concrete style
for architectural lines.**

These concrete decors elevate building façades with a luxurious aesthetic. Their raw surfaces are refined by a sophisticated harmony between bold architectural expression and timeless elegance.

Polished Opulence

A graceful, classic design creates a bright and serene atmosphere that enhances well-being.

Drawing from earthy tones like white, ivory, and beige, these new decors combine elegant simplicity with modern style through subtle veining and soft mineral textures.

An earthy palette brings serenity and **refined luxury**

Earth's Energy

An evocation of volcanic power meets the lushness of tropical vegetation, creating a dramatic contrast.

Rich textures and crystalline details mirror the dramatic cooling of magma - a statement of boldness, luxury, and enduring style.

Volcanic hues
channel nature's
dramatic energy

Echoed Harmony

The ECHO Naturals palette is crafted for balance and sophistication. Its soft tones – white, beige, and grey – seamlessly integrate with other collections in the Trespa® Meteon® portfolio, unlocking limitless possibilities for refined design combinations.

Combine subtle wood variations with bold solids or textured finishes to create spaces that are both distinctive and cohesive. Calm yet contemporary, ECHO provides the ideal foundation for designs where natural elements and architectural precision work in perfect harmony.

--------------------------------	--------------------------------	--------------------------------	--------------------------------

The large size of this panel allows an efficient machining of the product.

Thicknesses

Not all sizes and thicknesses are available for all finishes.

Check trespa.info for detailed and up to date Trespa Delivery Program, material property data sheets, specification text, certificates and test reports.

Sustainability at the core

Sustainability drives us forward. Our bio-based products put wood at the heart, creating solutions with a low carbon footprint for generations to come.

Nature meets innovation

Trespa® Meteon® panels are manufactured with a minimum of 58% biobased content which captures and stores carbon, actively contributing to CO₂ reduction.

Smart façades for decarbonised buildings

When used in ventilated façade systems, Trespa® panels help improve energy efficiency by reducing heating and cooling emissions – lowering your project's overall carbon footprint.
