ELEGANTA BROWN

ELEGANTA RED

THE ROOF WITH TRADITION – FROM NEW ZEALAND TO THE ROOFTOPS OF THE WORLD

GERARD® Roofs are the culmination of decades of development that began in New Zealand in the early 1950's. GERARD® Roofs can be found in over 130 countries worldwide.

RESISTANT TO EXTREME CLIMATIC CONDITIONS

A GERARD® roof defies high winds, heavy rain, snow, ice and hail. It is a roof for tomorrow's climate.

LIGHTWEIGHT AND IDEAL FOR RE-ROOFING

A GERARD® roof is up to 7 times lighter than traditional roofing products. This means substantial savings can be achieved in structural costs – no need to replace or strengthen the existing roof substructure. GERARD® tiles are not heavy or bulky, which reduces delivery costs and enables transportation to remote or mountainous areas not easily accessed by heavy goods vehicles.

MAINTENANCE AND WORRY FREE

Once installed it requires no maintenance and will protect your house for many years to come.

EXTREMELY LONG LASTING

GERARD® is guaranteed to be long lasting. Aluminium-zinc and Zinc-Aluminium-Magnesium coated steel provides superior long term corrosion resistance.

FIRE RESISTANT

GERARD® roofs have passed stringent international fire tests. The incombustible steel substrate and surface coating prevent the spread of flames when exposed to fire. The lightweight nature of GERARD® roofs considerably reduces the potential for the roof to collapse.

NOISE RESISTANT

Although GERARD® roofs are made of metal, they are not noisy. Carefully selected chip stone granules provide excellent surface coverage and minimises the noise of rain on the roof.

ENVIRONMENTALLY FRIENDLY AND RECYCLABLE

Steel can be recycled infinitely, without losing any of its qualities. Rainwater collected from GERARD® roofs has been tested and meets the World Health Organisation's criteria for drinking water.

50 YEARS WARRANTY

GERARD® offers you a 50 years limited Waterproof Warranty, in addition to quality customer service. For more information please have a look on our website.
