Colours
and multiple combinations

Wallpanels to paste
To decorate your walls
3 picture rails and skirting boards

A HIGH PERFORMANCE WALLPANEL

Improve the acoustic comfort and decor together

- α_w 0.25 - 0.40 / NRC 0.35 - 0.45
Thickness : 9.18 and 24 mm
- Easy to paste : paste the wall, edge to edge hanging
- Shock resistant
Easy to transport and handle : board dimensions
400x800mm or 800x1200mm
- Care : clean using a vacuum and a damp cloth.
Carpet cleaning products may be used for stubborn stains.

A FUNCTIONAL CONCEPT

Modular models : customise the layouts
And create decors to suit the style and the architectures of your space.

The raised areas and recesses of the models optimise the sound absorption of the panel.

Model Colour Thickness
(in mm)

Mouldings

4 models

Designed and delivered as a kit of 3 or 4 panels, 2.88m²

2D or 3D versions

Each model is available in 2 versions : with 2 cut-outs (2D) or 3 cut-outs (3D), creating the recesses, moulding shape and varied thicknesses.
Classic or contemporary, these variations create an acoustic surface to decorate walls and personalise spaces.

Versailles 2D

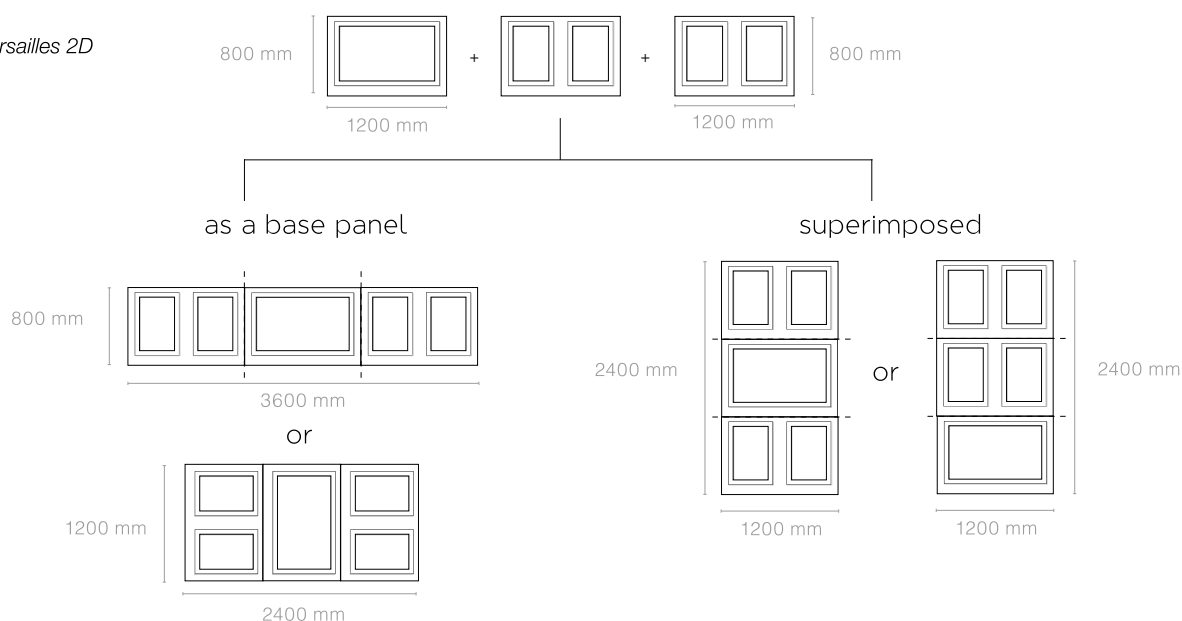

Versailles 3D

Create your layout

Example : Versailles 2D

The finishes

The ready-to-paint MDF skirting boards and picture rails are designed to add beautifully finished wall decorations for all settings, making the SlimWall collection a complete solution for both builders and contractors. Their shapes are designed to be modular to create multiple layouts to adapt to the architecture of your space :

Tonal or contrasting, personal your wall panel

Skirting

H 100 mm x L 2500 mm x E 15 mm

Bevelled picture rail

H 50 mm x L 2500 mm x E 15 mm

Connecting picture rail

H 50 mm x L 2500 mm x E 15 mm

Panelling

3 models

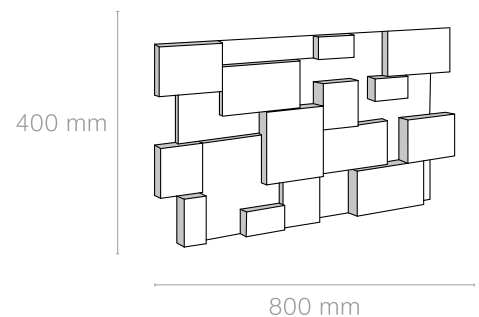

Created from 9mm Pet compact felt boards, the Panelling models are composed of complex architectural shapes, superimposed and overlapped small geometric shapes, on 3 alternating levels. Different layouts create unique models, with their varied patterns when they catch the light.

Chicago

London

Amsterdam

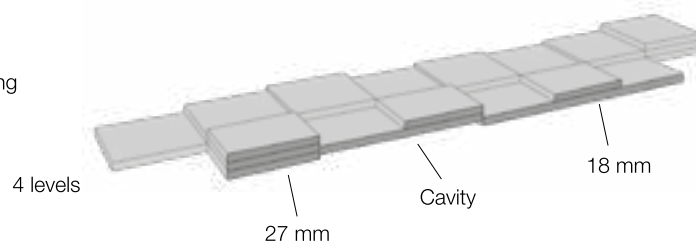

Created and delivered as a 9 pieces kit, of 2.88 m2

3D design

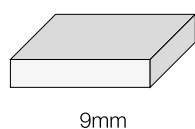

The different thicknesses and shapes of these 3D wall structures are designed to efficiently contribute to the treatment of sound vibrations and the acoustic absorption of your space.

Acoustic performance α_w 0.35 - 0.40 / NRC 0.45 - 0.50

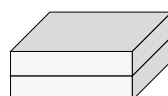

Example :
Cutout London panelling

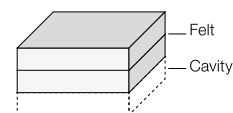

3D structures with invisible cavities to optimise acoustic absorption
